## Professional Biography

Roy Behymer has been consulting with Practical Safety Solutions since 2003. Prior to joining the company, he performed electrical maintenance and supervision at a commercial nuclear power plant. Roy served honorably in the U.S. Navy's nuclear power propulsion program onboard submarines. He has experience in operations, maintenance, repair and supervision. This includes training, job planning and scheduling, quality assurance, radiological controls and electrical, mechanical, and electronic systems.

Roy's technical and management safety experience includes:

- ❑ AC/DC Motors and Controls
- ❑ Medium and Low Voltage Distribution
- ❑ Troubleshooting
- ❑ Technical Research
- ❑ Procedure Development
- ❑ Lockout / Tagout
- ❑ Arc Flash / NFPA 70E Assessments

Roy maintains his Connecticut Electrical Unlimited Journeyman (E2) license. He recently completed his bachelor's degree in Electrical Engineering, being a member of Tau Beta Pi, Eta Kappa Nu, Golden Key and Mortar Board honor societies. Roy is a member of IEEE, including the Power Engineering Society and the Industrial Applications Society.
